

11th International Conference On Smart And Sustainable Technologies

Split - Bol // June 23-26, 2026

Bol - June 25, 2026

Panel discussion: Meet the Editors

Useful insights from journal Editors

HENRIK LUND
Editor in Chief, Energy
Strategy Reviews (Elsevier)

**AGIS
PAPADOPOULOS**
Associate Editor in Energy
and Buildings (Elsevier)

**PARIS
FOKAIDES**
Editor in Chief, International
Journal of Sustainable
Energy, (Taylor&Francis)

MODERATOR:

**SANDRO
NIŽETIĆ**
Editor in Chief, Energy
Sources Part A
(Taylor&Francis),
Subject Editor of Energy
(Elsevier),
Associate Editor of Solar
Energy Journal (Elsevier)

PANEL TOPICS:

‘Publish or perish’ is a phrase that describes the pressure put on academics to publish in scholarly journals rapidly and continually as a condition for employment (finding a job), promotion, and even maintaining one’s job as defined by Imad A. Moosa in his monograph from 2018. In the Oxford Dictionary of Phrase and Fable, ‘publish or perish’ is used to refer to an attitude or practice existing within academic institutions, whereby researchers are put under pressure to produce journal publications in order to retain their positions or to be deemed successful. The POP issue is primarily relevant to those working in academic institutions (called academics, academic researchers, or just researchers). However, some of the aspects of POP discussed in this workshop are relevant to non academic personnel who also seek publications because they are expected to publish, such as those working in medical laboratories, central banks and international organizations (WHO, IMF, BIS, etc). This is a condensed description of how important are publication activities. This has been already widely practiced by world leading universities in the past century, however with the nearly exponential growth of researchers and also scientific journals becomes one of the key issues. This panel session gathered a wide range of editors serving a variety of journals and world leading publishers to be available to share their experience with the attendees.

The topics to be discussed cover at least briefly: writing a potential successful scientific manuscript, selection of a right journal and their metrics, various types of paper submission, selecting and using the right references, similarity and plagiarism, correct novelty reasoning and presentation of the proposed methods and the results, proper conclusions writing, how to handle the reviewing process, final proofing, presentation and promotion of the published paper. Examples of successful publications will be given, with analysis of the features leading to their high impacts. The panels session is going to be followed by dedicated consultations of specific and individual features with close interaction with the audience.
